E. 自然環境について書かれた次の文章を読み、下の問いに答えなさい。

Do you know nature is sick now? Many people say, "The air is not clean in some big cities. Some forests and rivers are dying in some places of the world now." For many years we have polluted* the air by gases from cars and from other things. And we have cut down too many trees in the forests. We have also polluted a lot of rivers by waste and other things.

Many living things will not be able to live, (①) they cannot get clean air and water. ② Trees produce fresh air and provide places for many living things to live. So not only clean air and water (③) very important for living things.

To protect wonderful nature, we should stop cutting down too many trees in the forests and throwing waste into the rivers. And we have to take care of living things in the nature.

To protect nature is to protect us. We live together with all other living things on the earth. It is very important for us to think more about the relation between nature and our life.

pollute* 汚染する
